Industry Internships

Microsoft Research, Montreal
Research Intern 2018
Investigated the learning dynamics of neural networks as they train on single classification tasks, finding that certain examples are forgotten with high frequency, and some not at all, and that, based on these forgetting dynamics, a significant fraction of examples can be omitted from the training data set while still maintaining state-of-the-art generalization performance

Cognitive Computing Center, Thomson Reuters
Research Intern 2017
Investigated the use of a recurrent neural network encoder for unsupervised word-order sensitive hashing as a step towards improving ranking results
